SUBJECT: MIGRATORY BIRD, THREATENED AND ENDANGERED SPECIES, AND  
WETLANDS CLEARANCE TO PROCEED WITH POND C-2 TO BROOMFIELD  
DIVERSION DITCH PIPE REMOVAL - MBM - 025 - 96

On March 13, 1996, Ecology personnel accompanied Riedel personnel on an inspection of the proposed pipe removal route for the Pond C-2 to Broomfield Diversion Ditch Pipeline. No migratory bird issues were identified, and no threatened or endangered species are present. Several small wetlands were identified along the route, however. These wetlands were flagged with pink surveyor's flagging, and available routes around the wetlands areas were discussed. It is our understanding that Riedel will approach the pipe from the same old road as was used for the previous pipe removal in that area. A haul truck will be staged at the end of the road, and a front-end loader will be used from that point on to retrieve sections of pipe.

Should you have questions or require further information, please contact me at extension 3560.
